

## Cayman Island Company Registration Details

### Background of Cayman Island

The Cayman Islands, which comprise three islands in the Caribbean Sea south of Cuba, are a British Dependent Territory that was originally discovered by Christopher Columbus. The financial services sector is one of the main industries in the Cayman Islands, and there is a substantial commitment to the continued development of the offshore financial services industry. The reputation and popularity of the Cayman Islands have increased significantly, particularly in Asia, as they are one of only three offshore centers approved by the Hong Kong Stock Exchange for public listings in Hong Kong.
